SUMMARY

IT undergraduate with a strong foundation in full-stack development, embedded systems, and applied AI, built through hands-on projects spanning web platforms, mobile apps, and secure hardware-software integration. Comfortable working across the stack – from backend architecture to deployment – and quick to pick up new tools and frameworks as projects demand. Eager to learn from real engineering teams, take on challenging problems, and contribute meaningfully through a software development internship.

EDUCATION

G.L. Bajaj Institute of Technology and Management

Bachelor of Technology in Information Technology

• CGPA: 7.9

Kendriya Vidyalaya No. 2, Agra Cantt.

Class XII – 76.6% | Class X – 89.6%

Greater Noida, India

2024 – 2028

Agra, India

2022 – 2024

TECHNICAL SKILLS

Languages: Java (OOP), Python, C, C++

Frameworks: Spring Boot, Flask, Django, FastAPI, React

Mobile: Flutter, Android Studio

Web: HTML, CSS, Tailwind CSS, Bootstrap, JavaScript

Databases: PostgreSQL, SQLite, MySQL, Supabase

Tools: Git, GitHub, Docker, GitHub Actions, JWT

Cloud & DevOps: AWS EC2, Vercel, Render, CI/CD Pipelines

APIs: Groq AI (LLaMA 3.3 70B), HuggingFace Inference API

PROJECTS

EduMind – AI-Powered Study Assistant | *Spring Boot, React, Groq AI, Docker, AWS* | [GitHub](#)

2026

- Built a full-stack AI study platform for Indian university students to upload PDFs/images and auto-generate summaries, flashcards, and chat with their notes using Groq's LLaMA 3.3 70B model.
- Designed note organization (Course → Year → Semester → Subject → Chapter) with Google OAuth, JWT auth, and public/private note sharing for a student community.
- Deployed Spring Boot REST API on **AWS EC2** via Docker with React + Tailwind frontend on Vercel; automated CI/CD pipeline via GitHub Actions.

KMRL SmartDocs – AI Document Intelligence System | *FastAPI, HuggingFace, HTML/CSS* | [GitHub](#)

2025

- Built an AI document intelligence system inspired by a Smart India Hackathon (SIH) problem statement for Kochi Metro Rail Limited (KMRL).
- Integrated HuggingFace Inference API for multilingual summarization across Hindi, Tamil, Telugu, and Malayalam; FastAPI backend with SQLite for document storage.

SocioSphere – Community Issue Reporting Platform | *Flask, OAuth, SQLite, Bootstrap* | [GitHub](#)

2025

- Built and demonstrated at **HackLoop**, an inter-city hackathon at Thoughtworks, Gurugram; Flask app enabling citizens to report issues and NGOs to manage them across 15+ routes.
- Implemented OAuth-based authentication with role-based access control; deployed live on Render.

EXPERIENCE

509 Army Base Workshop (Indian Army – EME Corps)

Agra Cantt., India

Software & Embedded Systems Intern

Jun 2026 – Jul 2026

- Developing **MeshCrypt**, an encrypted LoRa-based tactical mesh communication system (4-node mesh network) with a companion Android app built in Flutter for secure offline field communication.
- Implementing AES-GCM encryption with HMAC-SHA256 node authentication and replay protection via monotonic counters in NVS flash to harden the mesh against tampering and spoofing.
- Working on a GPS spoofing detection device as a secondary deliverable to identify and flag falsified GPS signals for tactical positioning integrity.

GDG on Campus – GL Bajaj

Greater Noida, India

Developer

Oct 2025 – May 2026

- Selected as Developer through an interview process for the Google Developer Group campus chapter.
- Contributed frontend code to the official GDG GLBITM club website and assisted in organizing technical events and workshops.

ACHIEVEMENTS & CERTIFICATIONS

HackLoop Hackathon – Participated and presented SocioSphere at an inter-city hackathon hosted at Thoughtworks, Gurugram (2025).

Smart India Hackathon (SIH) – Cleared internal college selection round with an AI document intelligence solution (2025).

DSA Course – Completed a structured Data Structures & Algorithms course; certification expected shortly.
