SUMMARY

IT undergraduate skilled in building full-stack web applications using Java and Python. Built production-grade projects including an AI-powered study assistant with Spring Boot, React, and AWS, a multilingual document intelligence system, and a hackathon-demonstrated community platform. Seeking a software development internship to contribute and grow.

EDUCATION

G.L. Bajaj Institute of Technology and Management

Bachelor of Technology in Information Technology

- CGPA: 7.77

Kendriya Vidyalaya No. 2, Agra Cantt.

Class XII – 76.6% | Class X – 89.6%

Greater Noida, India

2024 – 2028

Agra, India

2022 – 2024

TECHNICAL SKILLS

Languages: Java (OOP), Python (OOP), C

Frameworks: Spring Boot, Flask, Django, FastAPI, React

Web: HTML, CSS, Tailwind CSS, Bootstrap, JavaScript

Databases: PostgreSQL, SQLite, MySQL, Supabase

Tools: Git, GitHub, Docker, GitHub Actions, JWT

Cloud & DevOps: AWS EC2, Vercel, Render, CI/CD Pipelines

APIs: Groq AI (LLaMA 3.3 70B), HuggingFace Inference API

PROJECTS

EduMind – AI-Powered Study Assistant | *Spring Boot, React, Groq AI, Docker, AWS* | [GitHub](#)

2025

- Built a full-stack AI study platform for Indian university students to upload PDFs/images and auto-generate summaries, flashcards, and chat with their notes using Groq's LLaMA 3.3 70B model.
- Designed note organization (Course → Year → Semester → Subject → Chapter) with Google OAuth, JWT auth, and public/private note sharing for a student community.
- Deployed Spring Boot REST API on **AWS EC2** via Docker with React + Tailwind frontend on Vercel; automated CI/CD pipeline via GitHub Actions.

KMRL SmartDocs – AI Document Intelligence System | *FastAPI, HuggingFace, HTML/CSS* | [GitHub](#)

2025

- Built an AI-powered document intelligence system inspired by a Smart India Hackathon (SIH) problem statement for Kochi Metro Rail Limited (KMRL).
- Integrated HuggingFace Inference API to summarize uploaded documents across all major Indian regional languages including Hindi, Tamil, Telugu, and Malayalam.
- Developed FastAPI backend with SQLite for document storage; clean HTML/CSS frontend for upload and multilingual summary display

SocioSphere – Community Issue Reporting Platform | *Flask, OAuth, SQLite, Bootstrap* | [GitHub](#)

2025

- Built and demonstrated at **HackLoop**, an inter-city hackathon at Thoughtworks, Gurugram; Flask app enabling citizens to report issues and NGOs to manage them across 15+ routes.
- Implemented OAuth-based authentication with role-based access control; deployed live on Render.

EXPERIENCE

GDG on Campus – GL Bajaj

Developer

Greater Noida, India

Oct 2025 – Present

- Selected as Developer through an interview process for the Google Developer Group campus chapter.
- Contributed frontend code to the official GDG GLBITM club website and assisted in organizing technical events and workshops.

ACHIEVEMENTS & CERTIFICATIONS

HackLoop Hackathon – Participated and presented SocioSphere at an inter-city hackathon hosted at Thoughtworks, Gurugram (2025).

Smart India Hackathon (SIH) – Cleared internal college selection round with an AI document intelligence solution (2025).

DSA Course – Currently completing a structured Data Structures & Algorithms course; certification in progress.
